

## OCCUPATIONAL HEALTH AND SAFETY POLICY

Powertech IST's policy is to establish a system for ongoing identification of hazards, the assessment of risks, and the implementation of appropriate control measures, which will enable Powertech IST to achieve the following objectives:

- Comply with all applicable Health and Safety Laws, Rules and Regulations applicable to Powertech IST's activities and operations.
- Establish, implement and maintain a documented Health and Safety Management System.
- Communicate this policy to all employees thereby establishing an awareness of their individual health and safety obligations in achieving;
  - Conformance to Powertech IST's Occupational Health and Safety Management System policy, procedures and requirements
  - Understanding the consequences, actual or potential, of their work activities and improved personal performance.
  - An understanding of their roles and responsibilities in achieving conformance to this policy.
  - An understanding of the risks or potential risks in departure from specified operating procedures and other requirements.
- Create a work environment, which strengthens the key characteristics of the Powertech IST Safety Culture.
- Undertake periodic reviews to monitor progress of defined health and safety objectives and targets and the continual improvement of Powertech IST's health and safety performance.

As evidence of Powertech IST's commitment to occupational health and safety, Powertech IST will publish this policy as an item on the Powertech IST Intranet and Reception Bill Board. In addition it will be available to any interested party or member of the public on request.
